Water will not be supplied to any premises for a bath tub or other specific purpose alone except where each separate use is included in the charge for which such fixture is available. Hydrants will not be allowed on any premises whatever unless the yearly water rent is $5.00 or more. In fixing rates where same is determined by the number of rooms, all rooms shall be counted, whether used or not. Such shall be considered private baths, water closets, urinals and wash basins, which are exclusively used by a single family, all others shall be considered public.

Rule 2. The City will furnish Corporation cock and insert same in the main and charge as follows: One-half inch, $2.50; five-eighth inch, $3.00; three-fourth inch, $3.50; and one inch, $4.00. All water attachments shall have a percussion air chamber of from eight to twelve inches above faucet, and in addition the applicant will be required to pay for all pipe connections and work done by the plumber whatsoever. And said City agrees after such work has been completed and approved by the Superintendent of Water Works to keep that part laying between the main water pipe and curb or stop box, in repair.

Rule 3. Water rents must be paid annually in advance at the office of the City Treasurer from July 1, and parties failing to comply with this rule will have their supply turned off. Whenever water is turned off in consequence of violation of any of the rules in these ordinances the City will charge one dollar for turning on again.

Rule 4. No person or family supplied with water by this City will be permitted to use the water for any other purpose than that stated in the application or agreement, or that estimated for in fixing the rates, nor supply water in any way to any other person or persons, nor shall they permit others to use their hose or attachments, or leave them exposed to use by others. The City agrees to furnish water for certain specified uses for a certain specified sum. If, therefore, consumers furnish other people, or supply water for animals or sprinkling or washing wagons, or to brick or stone masons, or plasterers, or allow it to be taken without permission from the City, it is a violation of the contract, and consumers so offending will be required to pay full price of water so used, or have the water shut off and forfeit the amount paid for license for first offense; if persisted in, the consumer will be held liable to prosecution under the law. Consumers must keep their sprinklers, hydrants, pipes, stop cocks and boxes in good repair, at their own expense, and keep all water outlets closed when not in actual use, and must prevent any unnecessary waste of water. The water at wash basins, closets, urinals, bath or other places, must not be allowed to run, to prevent freezing or wasted otherwise. A violation of this rule will cause the water to be shut off, and will subject the person so offending to the penalties and forfeiture of Rule 3.

Rule 5. The street for a given width may be sprinkled (not washed) by consumers having a license for sprinkling purposes; but hose shall not be used to muddy the streets, nor used long enough to cause the water to flow from the part sprinkled onto the surface of the next front, nor shall

the hose and attachments be converted into fountains or jets, nor used with an attachment to direct the flow of water, and no hose shall be used under any circumstances except when held by the hand. The use of hose by aid of frames, sticks, or by any other than by personal aid is strictly prohibited. When sprinkling the consumer must confine himself to the exact frontage or area paid for. Sprinkling will not be allowed where the consumer does not pay the rate for the whole premises, except by special contract, and then only when the sprinkling rate amounts to five dollars per annum. Keys to sprinklers are not allowed to remain exposed to use by others, nor shall hose be used without a nozzle No hose larger than three fourths of an inch, nor nozzle larger than one fourth of an inch, shall be permitted, except by special contract. The use of hand hose in the case of fire, is always permitted and it may be used by any one gaining access thereto. All cocks, faucets or other appliances for drawing or using water shall be kept closed, whenever the City fire hydrants are in use for extinguishing a fire.

Rule 6. No alteration or extension shall be made in any water pipe or fixture without first giving notice of such proposed alteration or extension, and receiving a permit from the City authorizing the same and the work must be done by a competent and licensed plumber.

Rule 7. In all cases where water is to be supplied to several parties or tenants from one connection or tap, the City contracts with one only of said parties, and on his, her or their failure to abide by these rules or regulations, the whole supply will be cut-off without notice.

Rule 8. The City reserves the right to set meters and charge meter rates at its option. Parties accepting meter rates in preference to special or established rates, will pay the cost of meter and placing same, or pay rental, as may be agreed upon, provided, that in no case the meter rate shall be less than the established ordinance rate. Whenever the City shall determine to place a meter upon any premises supplied by more than one connection with the street main, the superintendent shall notify the owner or occupant of the premises to so reconstruct his plumbing that the premises shall be supplied by one connection only, and if, after such notice, the owner or occupant refuses or fails to make such change, water will be shut off and will not again be turned on until the required change be made.

Rule 9. The superintendent or authorized agent of the City shall have access at all reasonable hours to all premises supplied, to see that these rules are observed.

Rule 10. The City reserves the right at any time, due notice being given by publication or otherwise, to shut off the water in its mains, for the purpose of making repairs or extensions, or for other purposes, and persons having boilers within their premises, not supplied by tanks or cisterns, are hereby cautioned against collapse.

Rule 11. Whenever the superintendent shall find that the stop-cock or box controlling the supply to any premises, or that any service pipe within the curb stone, or any fixture upon the comsumer's premises, is broken or not in serviceable condition, he shall at once notify the consumer of the fact, and should said consumer fail to remedy the defects, water will be shut off, and will not again be turned on until the apparatus be put in serviceable condition.

Rule 12. No license of water to be supplied to any premises will be made for less than one year, except special contracts.

Rule 13 Water rates, once paid are not refunded under any circumstances, but privileges may be transferred from one party to another, upon application and consent at the office of the City Clerk.

Rule 14. For a violation of any of the foregoing rules, and for the non-payment of rent, the City reserves the right to turn off the water, without notice, and any payment made shall be forfeited, and after the water has been turned off, from the service pipe, together with the expense of turning off and on such water, which expense shall in no case be less than one ($1.00) dollar.

Rule 15 The right is reserved to amend or add to these rules and regulations as experience may show to be necessary.

Rule 16. It is expressly stipulated by and between the City of Waterloo, and the consumers of water, that no claim shall be made against said City, for its failure to supply water by reason of the bursting of any street main, or the breaking of any service pipe or cock, or for any other unavoidable failure.

FORM OF APPLICATION.

Having read the accompanying Rules and Regulations, I hereby agree to be governed by them in the use of water, and also agree to pay the prices named for the same. I will want to use the water for the following purposes:
